## Precautions for use

### 1. Storage

- (1) The best Storage environment: temperature :5°C~30°C , Humidity:40% -80%HR
- (2) LED store after six months to be re-spectral color separation, to prevent the LED optical properties change

### 2. Production and application

- (1) need wear gloves when contact with led to prevent oxidation
- (2) ESD protection to be good
- (3) soldering: the pc type can use soldering iron, (the best temperature is 300°C/3sec) also can use Temperature Platform (150°C/30sec,max) the silicone type can use reflow soldering in addition to soldering iron and Temperature Platform
- (4) about Package-type silicone , It is recommended to bake before soldering when the pack is unsealed after 24h. The conditions are as following: 80°C 4-6h.
- (5) must have a good heat sinking, the temperature of the heat sink must be below 65 degree
